DOCTORS USERS OF OPIUM.

The sensation of the second session of the annual meeting of the New York State Medical Association in the Academy of Medicine in New York on Wednesday was a paper on "Morphinism Among Physicians," by Dr. T. D. Clother, of Hartford, Conn., who has for nine years made the subject a spec-

cial study.
"In fo lowing up this subject for nine years," he said, "I have studied all practitioners within my reach. Out of 3244 physiciaes, I found 681 of them, or 21 per cent., using opium, and 320 or 10 per cent. of them using morphine se cretly. It can be estimated that 6 per e. a.t. of all the physicians in the country nave the morphine habit secretly, while in some parts of the country the proportion will run up as high as 15 and 20 per cent. Probably 6 per cent. of these last are opium inebriates. 21 per cent., using opium, and 320 or 10

last are opium inebriates.
"Sometimes the habit is acquired during student life; but often the practice is not begun until the physician has passed the age of 30. The most common method is, of course, by the hypotermic needle, but many physicians take opium in the tincture. In either case the result is about the same.

"The morphine physician is general.

ly meditative in manner, but, with all eaving him. He has moods, one time alkative, at another silent. Occasionally he will make clear diagnoses and perform difficult operations, but more often he will fail completely. The end is often insanity or suicide. The incease in the number of inmates in our asylums who are physicians is astonishing and alarming. I have known obysicians give up alcoholic liquors for morphine, but never morphine for any-

"Worry, overwork, shock, irregularity of life and living all contribute to the habit. There is something fascinating in the instant relief had from the needle after a hard day's work.

"The physician may conceal the habit for a time, but soon neglects his duty, his personal respect, and childish vanity takes its place. He will inderse wild schemes, and has wonderful parts of the world, for the last ten

ician. The medical morphinist is dangerous to himself and others A physician who regularly prescribes mor-

was no cure for the habit. Many tried to stop it, but generally failed. The only remedy was its prevention. "Never use morphine with a needle on yourself under any circumstances," concludes Dr. Crothers. "And never use morphine any way except with the advice of a brother physician you can

trust. Dr. Wiggin cited the case of a certain medical society of 57 members, of whom 12 were morphine fiends. One deliberately acquired the habit to test an "infallible cure" which he had discovered but which proved inefficacious

Three Doctors in Consulation.

(From Benjamin Franklin.) "When you are sick, what you like best is to be chosen for a medicine in the first place; what experience tells you is best, to be chosen in the second place; what reason (i. e., theory) says is best to be chosen in the last place. But if you can get Dr. Inclination, Dr. Experience and Dr. Reason to hold a consulation together, they will give yon the best advice that can be taken."

When you have a bad cold Dr. In clination would recommend Chamber lain's Cough Remedy because it is plessant and safe to take. Dr. Experience would recommend it because it never fails to effect
a speedy and permanent cure. Dr.
Reason would recommend it because it is prepared on scientific
principles and acts on nature's plan in relieving the lungs, opening the secretural and healthy condition. For sale by all Druggists.
